

Dataset collection

National Renewable Energy Action Plans

Description:

The NREAPs collection is sourced from national renewable energy action plans submitted in year 2010 by each EU Member State as an obligation under Article 4 of the Directive 2009/28/EC. The collection provides information on the expected development of renewable energy in three main sectors: Electricity, Heating/Cooling and Transport. The NREAPs collection is transformed into a web-query structure in order to make it available to stakeholders and research community for their own purposes. The collection is structured, checked, aggregated and then explored in different ways: (i) Year; (ii) EU countries; (iii) Sectors; (iv) Sources. The NREAPs data are available to be downloaded in "excel" and "csv" format.
