## INFORM GRI 2019 release

### Description:

The results of the global INFORM model are available on the INFORM website ([www.inform-index.org](http://www.inform-index.org)). Results are available in the following formats: - Excel spreadsheet of each release (including all source data and calculations) - API (including all the releases) The global INFORM model is updated twice per year. From 2016, the main annual release will be in September, with a mid-year release in March. The global INFORM model covers 191 countries. The results are a risk profile for every country, which consists of a value between 0-10 for the INFORM Risk Index and all of its underlying dimensions, categories, components and indicators.
