

## JRC Dataset

### Naphtha; from crude oil; consumption mix, at refinery (Location: EU-15)

#### Description:

The data set covers all relevant process steps / technologies over the supply chain of the represented cradle to gate inventory with a good overall data quality. Crude oil mix information based on official statistical information. Energy carrier extraction and processing data are of sufficient to good (e.g. refinery) data quality. Inventory is partly based on primary industry data, partly on secondary literature data. The refinery emission data are based on literature and the European Pollutant Emission Register (EPER). Technical Purpose: Naphtha from refinery for industrial applications, e.g. as feedstock for the petro chemical industry. Geographical Representation: EU-15
