JRC Dataset

Kerosene / Jet A1 at refinery; from crude oil, fuel supply; production mix, at refinery; 480 ppm sulphur (Location: EU-27)

Description:
The data set covers all relevant process steps / technologies over the supply chain of the represented cradle to gate inventory. The energy consumption data and crude oil mix supply information are based on official statistical information. The energy carrier extraction and processing data is of good data quality. The inventory is based on primary industry data and completed, if necessary, with secondary literature data. The refinery emission data are based on literature. Synonyms: Jet A1 Technical Purpose: Supply of kerosene for e.g. road transport, residential heating, electricity generation and other applications. Geographical Representation: EU-27
