JRC Dataset

Polystyrene (general purpose) granulate (GPPS); production mix, at plant; crystal form is pure polystyrene with few additives, used when clarity is required even though it is very brittle (Location: RER)

Description:
Raw data for polymerization and intermediate products are collected by several producers in Europe; the average is calculated by the consultant based on the production capacity of the companies. The LCI result is calculated with background data from the Boustead database. Technical Purpose: Polystyrene is a versatile polymer resin used in a wide range of applications - especially in the packaging industry. Geographical Representation: RER

Contributors:
- Pennington, David david.pennington@ec.europa.eu
