JRC Dataset

Lightweight concrete block; expanded clay as base material; production mix, at plant (Location: RER)

Description:
The data set represents an application mix of lightweight concrete blocks, which can be used as partition wall, inner wall and exterior wall. It covers all relevant process steps / technologies over the supply chain of the represented cradle to gate inventory with a good overall data quality. The inventory is mainly based on industry data and is completed, where necessary, by secondary data. Technical Purpose: Standard mineral product used as wall material in the building industry according to the applied technology. Geographical Representation: RER
