JRC Dataset

Anhydrite (CaSO4); technology mix of natural (33%), thermal (33%) and synthetic (33%) produced anhydrite; production mix, at plant; grinded and purified product (Location: DE)

Description:
The data set covers all relevant process steps / technologies over the supply chain of the represented cradle to gate inventory with a good overall data quality. The inventory is mainly based on industry data and is completed, where necessary, by secondary data. Technical Purpose: Standard mineral product used as bonding agent in the building industry according to the applied technology. Geographical Representation: DE
