JRC Dataset

Polyamide 6.6 fibres (PA 6.6); from adipic acid and hexamethylene diamine (HMDA); production mix, at plant; PA 6.6 granulate without additives (Location: EU-27)

Description:
The data set covers all relevant process steps / technologies over the supply chain of the represented cradle to gate inventory with a good overall data quality. The inventory is mainly based on industry data and is completed, where necessary, by secondary data. Synonyms: Nylon 6.6 fibres Technical Purpose: This polyamide fibres data set represent a standard technical product and can be used widely where polyamide fibres are used, especially as reinforcement in plastics and composites applications. Geographical Representation: EU-27
