JRC Dataset

Electricity Mix; AC; consumption mix, at consumer; 1kV - 60kV (Location: NO)

Description:
Good overall data quality. Energy carrier mix information based on official statistical information including import/export. Detailed power plant models were used, which combine measured emissions plus calculated values for not measured emissions of e.g. organics or heavy metals. Energy carrier extraction and processing data is of sufficient to good (e.g. refinery) data quality. Inventory is partly based on primary industry data, partly on secondary literature data. Synonyms: power grid mix Technical Purpose: Medium voltage (1kV - 60kV) electricity for final consumers. Geographical Representation: NO
