JRC Dataset

UDP - Atmospheric emissions of PM2.5, 2010 - 2030 (JRC LUISA Reference Scenario 2016)

Description:
The indicator shows the spatial distribution of PM2.5 (sub-25µm particulate matter in 100 kg/year) emissions over Europe.

Other resources
Urban Data Platform
The Urban Data Platform is a joint initiative of the Directorate General Joint Research Centre (DG JRC) and the Directorate General for Regional and Urban Policy (DG REGIO) of the European Commission. It provides an access point to exchange
information on the status and trends of European cities and regions. It visualizes data via maps at three different geographical units including EU-wide Cities/Greater Cities, Functional Urban Areas and Metropolitan Regions. It also includes time series graphs for selected cities, for Metropolitan Regions, and by degree of urbanisation.

LUISA Territorial Modelling Platform
The LUISA Territorial Modelling Platform is primarily used for the ex-ante evaluation of EC policies that have a direct or indirect territorial impact
