## Wind Storm in north-east of Italy (2018-11-07)

### Description:

Activation time (UTC): 2018-11-07 10:55:00  
Event time (UTC): 2018-10-26 22:00:00  
Event type: Storm (Extra-tropical storm)

#### Activation reason:

From the first hours of 27 October until 30 October an intense weather event with heavy rain and very strong wind occurred in North Italy and affected especially the North East part (Friuli Venezia Giulia, Veneto, Provincia Autonoma di Bolzano and Provincia Autonoma di Trento). The event has been important both for intensity and for the duration (it lasted almost 4 days). The heavy rain caused the rapid increasing of the level of Livenza, Piave, Tagliamento and Adige rivers, many areas flooded and an extensive amount of mud and debris flow occurred.
