Dataset collection

An open software/hardware/data framework for air quality monitoring

Description:
This collection includes raw (non-calibrated) observation data created by AirSensEUR sensor units. Data has been used to develop (i) data exchange mechanisms, and (ii) calibration techniques.

Landing page:
https://airsenseur.org/

Datasets:
- Raw data collected by the AirSensEUR platform [jrc-10122-10001]
