## CEMS Rapid Mapping

### Description:

Rapid Mapping is one of the two on-demand mapping services under the Copernicus Emergency Management Service (CEMS). Rapid Mapping delivers geospatial information (in different vector and raster formats) in the midst of or immediately after catastrophic events or humanitarian crises. It is available 24/7/365. Supported disaster types range from natural hazards such as floods, fires, storms, tsunamis, volcanic eruptions, landslides, and earthquakes to industrial accidents and humanitarian crises. Data are open access (with a few exceptions), direct file download through the web interface (shapefile, kmz, georeferenced TIFF, JPG, PDF)

### Contact point email:

jrc-ems-rapidmapping@ec.europa.eu

### Landing page:
