

JRC Dataset

The PREF study – Analysis of national public research funding, data

Description:

The JRC managed Public Research Funding (PREF) study has collected information on and analysed national public research funding. It provides an overview of its evolution and current state in European and selected non-European countries, particularly as concerns funding themes, fields and the types of allocation (competitive project based versus institutional funding). The study was conducted by a consortium led by IRCRES CNR and involving researchers from USI, AIT and NIFU as well as a number of country experts.
