Polypropylene granulate (PP); production mix, at plant (Location: RER)

Description:
Raw data for polymerization and intermediate products are collected by several producers in Europe; the average is calculated by the consultant based on the production capacity of the companies. The LCI result is calculated with background data from the Boustead database. Synonyms: Polypropylene; Polypropene; Propene polymers; Propylene polymers; 1-Propene homopolymer Technical Purpose: A large proportion of polypropylene is used in fibres as constituents of fabrics, upholstery and carpets. Many industrial uses involve ropes, woven and non-woven fabrics and reinforcements. Blow moulded containers, such as bottles. A wide range of injection moulded items exists in appliance housings, resistant containers, car components, toys and furniture Geographical Representation: RER
