JRC Dataset

Nylon 6 glass filled (PA 6 GF); production mix, at plant (Location: RER)

Description:
Raw data for polymerization and intermediate products are collected by several producers in Europe; the average is calculated by the consultant based on the production capacity of the companies. The LCI result is calculated with background data from the Bousted database. Synonyms: PA glass filled, Nylon glass filled Technical Purpose:
About two thirds of the nylon produced in Europe is used for fibres (textiles, carpets, etc.) while most of the remainder is used in injection moulded components (automotive parts, consumer goods, etc.) Geographical Representation: RER

Contributors:
