

JRC Dataset

European Soil Database v2.0 (vector and attribute data)

Description:

This database (2004) is the only harmonized soil database for Europe, extending also to Eurasia. It contains a soil geographical database SGDBE (polygons) to which a number of essential soil attributes are attached, and an associate database PTRDB, with attributes which values have been derived through pedotransfer rules. Also part of the database is the Soil Profile Analytical Database, that contains measured and estimated soil profiles for Europe.

Keywords:

Base de Donnees Geographique des Sols d Eurasie au 1 1 000 000, Environment, European Soil Database, European soil bureau network, Land Management, SGDBE, Soil, Soil Geographical Database of Eurasia, Soils, geoscientific information
