JRC Dataset

Replication Data for: Travel speed changes along the European core road network for the period 1960–2030: an application of octilinear cartograms

Description:
Three classes of roads (1,2,3), class 1 being highways. Six time periods: 2012, 2000, 1990, 1980, 1970 and 1955 Field NCLASS_xxx is the class of the road in each year (last xxx digits) Travel time is the time (in minutes) to travel the distance (shape_length, in meters) at the speed of the class the road has in 2012.
